Quest 1: "HTML Basics – Your First Webpage"

Motto: "Small steps to big creations!"

Objective:

Explore the basic building blocks of HTML and use them to create your very first webpage.

Quest Tasks:

1. Research and Learn

What are HTML tags?

--What is the purpose of the <p> (paragraph) and <h1> to <h6> (headings) tags?

--How do you create a basic HTML document structure?

2. Create Your Webpage:

--Start with the basic structure of an HTML page (Hint: Think about <html>, <head>, <body> tags).

--Add a title for your page inside the <title> tag.

--Write a short introduction about yourself using <p> (paragraph).

--Use <h1> to <h3> to add headings for different sections (e.g., "About Me", "Hobbies", "Goals").

Submission Guidelines:

Save your webpage as index.html.
